

## Chinese University Governance: The Present and Future

Li Jianmin

Minister-counselor Education and Culture  
The Mission of P.R. China to EU

Two modes of  
high-level  
university  
development

“academic accumulation”

---Oxford, Cambridge, etc.

“management innovation”

---Warwick University, Hong Kong  
University of Science and Technology,  
and VUB and so on.

## Management Innovation

- \*the key is to achieve common governance
- \*a large administrative system has formed
- \*common governance is tending more and more important than ever

China has been keep reforming and making progress in the following fields:

1. Correctly handles the relationship between universities and the Government
2. Correctly handle the relationship between administrative power and academic power.
3. Promote University information to be more open and transparent.

Until 2020, China will take the following measures, to improve a well-balanced university governance:

1. First, gradually abolish university administration level.
2. Second, cancel all non-administrative licensing approval.
3. Third, Support various social organizations participate in educational evaluation.
4. Fourth, Protect the school's autonomy according to law.
5. Finally, the forum provides a good chance for us to discuss and exchange idea.

Thank you all !
